

AccuCare Release Notes 9.8E

This version of AccuCare includes a new feature called Custom Forms as well as other enhancements and bug fixes.

New Features

1. Custom Forms

Agencies now have the ability to create and publish forms, questionnaires, surveys, etc. with full data entry, reporting and export capabilities. Users can create a form with check boxes, radio buttons, selection boxes, text boxes and text areas to automate most of your agency's existing questionnaires.

Custom Forms also lets users clone previously created forms to save time as well as test or demo forms before publishing making sure the final questionnaire meets your agency's specifications.

Setup > Custom Form Builder

Enhancements and Bug Fixes

REMINDER: It is recommended that you are operating the AccuCare Web system on Internet Explorer 9 or higher, Firefox or Chrome. Some features in AccuCare are not supported in older browsers, therefore may not function properly.

- Added a 'check all' checkbox to the 'exclude' column when creating Group Notes
- Progress Note Statements have increased amount of characters allowable
- Corrected the ordering of the questions on the TEDS report
- Improved how Client Intake prints a report for an archived client
- When archiving the currently selected client, that client will not get re-selected in clinical modules
- 835 files with a large number of transactions are handled more efficiently in ERA Processing
- In the American Indian/Alakasa Native Supplement, change a tribe entry to "Little Traverse Bay Bands of Odawa Indians of MI"
- Added Landscape view to Chart Management
- Aged Claim Report Delete functionality is now present
