

AccuCare Release Notes 9.8I

New Features

1. Client Census

The Census is a new feature in AccuCare that allows users to view on one screen, a grid of the levels of care/treatment settings that are active, current and open for one, multiple or all clients in your agency. The Census can be accessed from the Main Menu of AccuCare.

The Census grid can filtered by: Client(s), Location of Service, Primary Case Manager, Level of Care and Admission Date. The grid results can also be exported to Excel for further analysis.

The screenshot displays the AccuCare Client Census interface. At the top, there is a 'File > Census' menu. Below it is a 'Filters' section with a search box for clients, a 'Choose Filter(s):' dropdown, and a 'Date of Service' section with radio buttons for 'All Dates' and 'Date Range' (with 'to' and calendar icons). 'Apply Filters', 'Clear Filters', and 'Display All' buttons are also present.

Client	Client Reference #	Age	Admit Date	Loc of Service	Primary Case Manager	Level Of Care	Chart
Acharya, Surendra		29	04/14/2016	Happy Trails	Staff	Level I - Outpatient treatment

Below the grid is an 'Export to Excel' button. An overlay window shows the AccuCare main menu with various icons. A red arrow points to the 'Census' icon in the 'Reports' section.

Enhancements and Bug Fixes

REMINDER: It is recommended that you are operating the AccuCare Web system on Internet Explorer 11 or higher, Firefox or Chrome. Some features in AccuCare are not supported in older browsers, therefore may not function properly.

- Users will now be able to retain their last view in Scheduler when exiting the module, then returning back (i.e. viewing 3 staff schedules, exiting to another module, then upon returning to Scheduler, the 3 staff schedulers re-appear)
- Minor fixes in Scheduler to check-in status updates and client search functionality
- Enhanced Episodes of Care (re-labeled as Admission/Discharge) by adding indicators to the tabs of each episode to show if the level of care or episode has been discharged or closed. The status of Admission, Discharged or Closed in addition to the date of the status change will now appear on the tabs for convenience.
- Modifications to the National Data Warehouse export engine
- Improved layout and time increments in all time pickers used in AccuCare for more usability and consistency throughout the system
- Additional information added to Claims and Unpaid Insurance report for Business (NPI and Tax) and Client (Date of Birth)
- Modify Billing Transfer to include notes from Client Payment in Scheduler
- Billing to include additional fields in Provider Information setup to capture “Bill As” details to allow a Provider that may use different provider information to submit on claims
- Added the ability to enter a label or abbreviation to a Provider in Provider Information, to help easily identify when there are multiple Provider records for the same person.
- Additional merge fields added to Custom Forms Builder to add more data capabilities
- Improved readability of progress notes “view only” mode so text is more visible
- Relabeled the "Referrer" field set in Client Billing Information to "Referring Provider"
- Additional maintenance to improve speed and efficiency of Scheduler
